

Dr. Rowen,

Penny, mother

Patient is her son, Kyle

Male 15 years old

Kyle has had asthma since birth with the typical chronic asthma history with multiple hospital stays and functional disabilities.

Treated one time with asthma protocol and then followed with airborne allergies and has had great results.

---

Bernadette

Female around 40

Dx with MS for many years with all the meds and typical history.

Treated one visit and the at home with 20 min two times a day over period of 3 months. Within 2 weeks had noticeable difference and following program has completely recovered.

She has MRIs that demonstrate reduction in scarring on the brain stem and doctor now says he can't say that she does not have MS but he would never DX her with MS now.

---

Talk to her about Philip, she referred him to us. He was her husband's step father. He had MS and a multitude of other problems. We were not sure he would survive until he got the laser at the time. He is doing much better.
