

Safety

Relieve pain and suffering and above all else, DO NO HARM...

We at LazrPulsr System consider **SAFETY** to be the **FIRST** and **PRIMARY** above all else. Therefore we take great measures to insure that the LazrPulsr Therapy Systems are among the safest therapeutic lasers on the market today.

Pulsed Frequency:

Regardless of the rate of pulse, just pulsing the light waves will change the effects on the tissue. Pulsed light will typically have a stimulating effect on tissue where continuous wave light typically has a sedation effect on tissue after a short period of time.

More powerful than just pulsing the light is pulsing the light at specific frequencies. Specific frequencies have the ability to modulate all living cells, called frequency biomodulation. Not only cells, but specific frequencies and specific frequency combinations can also modulate organs, systems and functions of the body as well. These frequencies are specific for each type of cell, organ, system or function of the body. Therefore the frequency that will stimulate the healing of an injured human skin cell will not specifically stimulate the healing of a liver or bone cell. Furthermore frequencies that stimulate the healing of human tissue will never stimulate bacteria to grow.

This makes frequency therapy not only exceptionally valuable in therapy it means that the frequencies selected are very important for safe operation of any pulsed laser therapy system. For this reason we have preprogrammed hundreds of frequencies and frequency combinations that are safe and effective for human and animal use into every LazrPulsr 4X.
