**Dear Health Care Provider,**

We have been asked many times by our clients to formulate a General Health therapy procedure for our Mk III therapy systems similar to the procedures we developed for our more advanced therapy systems. These procedures are extremely effective and simple to follow because they are basically the same for all patients. Orthodox training teaches doctors to find the causes of your specific disease and remove them. Whereas true health care teaches us to find the missing causes of health and restore them. This is why we can develop one procedure for all of your patients, because all of your patients require the same basic components to be healthy.

To be able to produce this type of therapy procedure requires a very high level of therapy with a broad spectrum of procedures that is not available in other therapy lasers or even in our early model therapy systems. As we continued to redeveloped and expand the therapeutic effectiveness of our therapy systems we are now able to create a General Health therapy procedure for the Mk III therapy systems. We call this procedure our Foundational Health procedure because this procedure is designed to help restore the basic foundational components that everyone needs to be healthy.

This therapy procedure will address how the body responds to everything it comes in contact with, everything it eats or breathes, and how the body manages its own internal basic physiological, immune, and emotional functions. **Once these basic Causes of Health have been restored to any extent the entire health of the patient begins to improve regardless of the complaint.**

Thank you

Dr. Gerry Graham III  
President, LazrPulsr System
