

FLU

We all come in contact with flu viruses every year, but is that what causes the Flu?

The Flu has been around for many centuries and the words and descriptions tell us exactly what the flu is and what causes it. The word Flu comes from the word Influenza. Influenza comes from the word Influence. And the flu originally was thought to be caused by the influence of the change in stars. We know that the stars change with the seasons. So instead of the influence of the stars it was actually the influence of the change in seasons. So what does the change in seasons have to do with the flu?

As seasons change not only do the stars change but our environment changes also. The amount of sun light changes, the temperature changes, the amount of moisture and type of moisture changes, even the foods we eat change, at least when you are eating local seasonal foods as they did centuries ago.

All of these changes in the environment force the body to change and adapt to its new environment. As long as the body is healthy and has the resources to adapt to the new environment then there is no problem. However if the body is not as healthy as it should be and does not have the resources to adapt to the changing environment then it breaks down and we get sick. As the body becomes compromised so does the immune system so whatever virus is present at the time is what we get. But it has nothing to do with the cause of the flu illness. So the body forces us to stay in bed for a week or two and we naturally improve our diet and drink more water and the body finally adapts to the new changes in the environment and we recover.

So I ask you, how can you immunize your body to changes in the environment? I guess that would be to move to the equator where the changes are minimal. Beyond that, what you need will not come in a shot. To correct the flu we have to correct the body and help it adapt quicker and then address any viral infection that took hold while we were in a much compromised condition.

This protocol was designed to help the body adapt to the seasonal changes that cause us to become sick.

By following the entire protocol you will have a fuller and quicker recovery with less risk of coming back down with the flu.

Thank You
