

GMO Detoxification

Dear Home Health Care Provider,

We have known about the GMOs (Genetically Modified Organisms) for many years but only recently discovered just how dangerous to the nervous system they actually are. GMOs are not something that the body can become accustomed to and are a daily insult that significantly disrupts the general functions of the body down to the genetic level in some areas.

Unfortunately GMOs are now part of our life that no one can completely escape from. Even the strictest dietary program cannot eliminate all GMOs and the general population has no chance to avoid a significant amount of them.

The procedure to help the body detoxify itself from these modified organism's needs to be performed repetitively and then be performed routinely to maintain a lower level of toxicity within the body. And even though we cannot completely remove all of the ill effects of GMOs we can significantly diminish their toxic effects on the body. Therefore it did not make sense to place this procedure in with the Foundational Health procedure.

To help our clients manage this systemic assault on our health we developed a short procedure directly targeting the effects of GMO toxins on the body called the, GMO Recovery procedure. This procedure is much more effective after you have completed the Foundational Health procedure but at the same time the Foundational Health procedure is much more effective once the GMO Recovery procedure has had a chance to diminish the toxins from the GMOs.

Therefore we leave it up to the individual which procedure they want to begin with depending on their own current health. My general recommendation would be to run them concurrent with each other usually beginning with the first visit of the GMO Recovery procedure. Depending on the time you have, complete the Foundational Health procedure while intermittently adding the GMO recovery procedure as well.

The following treatment record will outline the best procedure we have at this time for managing these many different GMO toxins. As we advance our understanding of GMOs, as new GMOs continue to be released into our environment, and as long term use of GMOs continue to change our foods, we will continue to modify and improve the therapy programs to help protect us from them.

For optimal results we recommend that you run this program

1 time a week for 1 month

2 times a month for 6 months

1 time a month thereafter.

The #111 All Tissues / Genes requires the use of a Therapy Card. This card is included with your LazrPulsr 4X Home therapy System.
 Hold this Therapy Card with your left fingertips on the magnetic strip and follow the directions on the card.

NO DIET SWEETENERS!! Not even Stevia of any form

Essential Oil Recommendations: Sage Essential Oil, 10 drops along the full length of the spine 2 to 3 times a month.

Consult with your health care provider to learn more about how to avoid GMOs in your diet.
