

Dear Health Care Provider,

Mk III Personal & Professional Lyme Recovery Protocol

Lyme and Lyme associated illness is widespread throughout the US. It has been estimated that at least 3 out of every 10 people in the US are currently suffering from Lyme related symptoms at any given time. This percentage is much higher in areas that are common for Lyme. Lyme can mimic almost any other disease and very often mimics any neurological or emotional condition. Regardless of the condition that your patient presents with, Lyme may be a significant underlying cause or complicating factor to that condition.

This procedure has shown to reduce the symptoms of Lyme in many cases and can be a significant support for almost any of your patients.

Thank you

Dr. Gerry Graham III
President, LazrPulsr System

This procedure requires 4 Therapy Cards. Each therapy card contains a complex homeopathic remedy required to complete each therapy program.
