

November 2015

I became aware of Dr. Graham's Lazar treatments in the summer of 2015. I had come to his office to buy some Standard Process Products, and that is when I was introduced to the Lazar procedure.

I discussed my past health history with Dr. Graham. I had been bothered by Rheumatoid Arthritis since 1980. Dr. Graham was of the opinion that what I had might be something else, for example Lyme disease. Since they could never find the RA in my blood, that was a good possibility.

I then started the Lazar treatments Dr. Graham prescribed. After several treatments the following are some of the positive results.

***I no longer have swelling in my hands and feet to the level that I had in the past. I was able to go down a shoe size with the shoes I wear because of the decrease in swelling in my feet. If I'm on my feet a lot during the day, my feet may be swollen a little but are back to normal by the next morning. Before this it would take two or three days for the swelling to decrease.**

***My body is able to sweat normally. In the past this was not the case. I would have monthly, what I would call attacks and for two nights straight I would have night sweats. Now that is not the case.**

***Due to swelling and etc. in my joints it affected my range of motion. After the Lazar treatments my right elbow has greatly improved. In the past I could not straighten my right arm. Twice just my right arm broke out in a sweat in my wrist area and after that happened my movement in my elbow and straitening my arm has greatly increased. So, I know my body is responding and healing itself, which I have never experienced before.**

I have felt better than I have for years, thanks to these Lazar treatments.
