

## Incorporating Natural Energy Medicine into your Practice.

### Home Health Care

(Part 3)

The first thing that we recommend for all patients with Chronic Health Issues is that they receive daily support care with a **LazrPulsr Mk III Home Therapy System**.

**Home health care is deigned to do two things.**

1. ***Increase the speed of recovery.***
2. ***Improve your outcome.***

I thought this was the reason that doctors are required to take continuing education courses. Keeping healthy happy patients builds your practice like nothing else. It is the fastest and easiest way to build a cash practice.

The LazrPulsr Mk III Home Health care system will allow you to give your patients homework in-between your visits.

We have developed 35 Home Therapy Programs. There are enough to develop a targeted therapy program for almost any condition your patient may present with yet few enough to keep the therapy selection simple enough for the average home user.

The programs in the Home Therapy system are in 3 different categories. First we have the 35 home therapy programs. These are divided into 5 different program types:

The first 6 programs are for general therapy that can and should be used with all other programs.

1. ***Fatigue/Recovery***
2. ***Aura Health***
3. ***Radiation Detox***
4. ***Structural Balance***
5. ***Maintenance***
6. ***All Pain***

The second two programs are specific to allergies, #7 for allergies related to headaches and #8 for general allergies.

7. ***Headache***
8. ***Allergy***

The 3<sup>rd</sup> group of 6 programs are for first aid. Named so that any person can select the correct program for the injury they have.

9. ***Burns***
10. ***Fractures***
11. ***Strain/Sprain/Bruise***
12. ***Wounds***
13. ***Surgery***
14. ***Venomous Bites***

The 4<sup>th</sup> group is made up of 16 programs that are specific to conditions that you as their doctor will usually prescribe but many of these can still be selected by the patient such as Sleep and Emotional Stress.

15. ***Sleep***

16. ***Emotional Stress***
17. ***Digestive Health***
18. ***Ear Health***
19. ***Eye Health***
20. ***Diabetes***
21. ***Glandular Health***
22. ***Hormonal Health***
23. ***Joint Health***
24. ***Lung Health***
25. ***Lymph***
26. ***Meninges***
27. ***Skin Health***
28. ***Neuro Health***
29. ***Detoxification***
30. ***Arthritis***

The 5<sup>th</sup> and final group is specific for pathogens, viral, bacterial and fungal.

31. ***Bacterial Infections***
32. ***Flu/Viruses***
33. ***Fungus***
34. ***Lyme***
35. ***West Nile***

The next category are the initial 49 frequency programs of the Mk III. They will each run the specific frequencies of that program for 10 minutes. These programs give the doctor greater options for their patients to run at home.

The final category is a list of 20 additional therapy programs from the professional units. These programs allows you to offer the General Health Program for your home users and also add more targeted therapies for you to prescribe.

The Home Therapy system allows the patient to take an active role in their health care and work with you as their provider. This is the relationship that younger patients desire to have with their health care providers. After all with the medical sites on the internet most of them will know more about their conditions than you will when they enter your office and want to be treated as an intelligent person with a say in their care. These patients will be your best and most loyal patients and will refer others that want to be treated the same.

Support your patients with the Home Therapy system. This creates a bond between you and your patients like nothing else can.

Dr. Gerry Graham III  
President: LazrPulsr System
